---

March 15<sup>th</sup> is right around the corner and why is that important? Because this is the day F5 units go into production! To help get you and your teams prepared for this next generation fryer, check out the list of training and resources you can use now to start preparing for this launch.

**Cyber Café 24/7 Training** – Start with two new training courses that you will find in your Cyber Café 24/7 content library:

- F5 / LVE30X open fryer start up train the trainer.
- F5 Technical Differences

**In-Person Technical Training** – Attend an in-person tech training:

- F5 has been added to our level 2 technical training and most regional technical training classes since the beginning of 2023. Periodically check live sessions to find the next session near you.

**Live stream Technical Training** – Log in to our end of March live stream training:

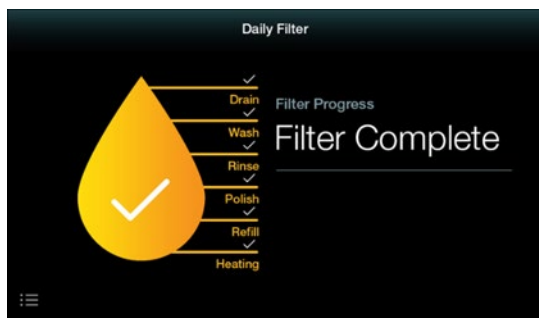

- F5 differences and updates live stream training found in Live session – register on Cyber Cafe

**Videos** – learn more about control features and other procedures:

- F5 [Video library](#)
- More videos focused on operation training coming early April 2023

**Resources** – Learn more through reviewing the service content links on

[Service cloud knowledgebase](#), which includes links to parts, operation, and the technical manual:

- [Operation resources](#) – English along with German, and French documentation.
- [Parts list](#) – Includes stocking level recommendations.
- [Technical manual](#) – Technical / Service content
- [Startup form](#) – Requires Extranet access.
